

Bryan Romero Chinchilla

Backend Engineer | APIs & Automation

 bryancio506.github.io  bryan-romerochinchilla  bryan.romero.chinchilla@gmail.com  +506 8861-5958

I'm a software engineer with 6+ years in Python, Go, and Node.js who builds the APIs, microservices, and databases behind operational systems. I got my start in manufacturing, where I owned a plant-wide system end-to-end as the sole developer -- from database and business-logic design to deployment. Since then I've focused on building services that integrate cleanly with payment gateways, legacy systems, and event-driven (MQTT) infrastructure, and I like turning messy processes into systems a team can depend on. English B2+.

EXPERIENCE

ACCENTURE (ONPROCESS) | PRODUCT MANAGEMENT SENIOR ANALYST

Jul 2025 -- Feb 2026 | Heredia, CR

- Maintained and refactored Python microservices (FastAPI) for a multi-carrier (UPS/DHL/FedEx) package-tracking platform on Azure AKS, backed by Cosmos DB.
- Built and consumed REST integrations against third-party carrier APIs (UPS, DHL, FedEx).
- Used KQL log analytics against Azure Service Bus to diagnose message-processing failures.
- Built monitoring and a reprocessing pipeline that cut stuck packages from ~30-40% to ~10-15%.

BRIDGESTONE LATINOAMÉRICA NORTE | IT SR. SPECIALIST -- MANUFACTURING APPS

Jun 2024 -- Jul 2025 | Belén, Heredia, CR

- Built internal automation tools and APIs (Python, C#, Node.js) for Industry 4.0 initiatives.
- Added a Redis caching layer (daily scheduled job) that cut a plant-critical report from ~2 hours to a few seconds.
- Tuned and administered SQL Server and Oracle databases for plant-critical app availability.
- Built KPI dashboards (Power BI) used by supervisors and process engineers for decision-making.

FREELANCE -- NAVIGATOR | SOFTWARE ENGINEER

Sep 2023 -- Jun 2024 | Costa Rica

- Built and deployed a Node.js billing portal end-to-end on DigitalOcean, integrating a legacy SOAP system and the Evertec payment gateway via webhooks.
- Wrote Python automation scripts for a reproducible on-premise LLama2 deployment with a data-science team.
- Handled hosting, releases, and end-to-end support on DigitalOcean.

INTEL CORPORATION (OUTSOURCED) | SOFTWARE ENGINEER II

Jul 2022 -- Sep 2023 | Costa Rica

- Built a cross-platform Python/PyQt installer wizard automating lab setup, cutting setup time ~87% (1-2 hours to 15-20 min) for 20-30 technicians.
- Supported technician teams by installing and configuring software across servers, NUCs, and lab hardware.
- Automated tooling deployment (Python, Bash, PowerShell) on RHEL and Windows Server for enterprise LTS products.

CECROPIA SOLUTIONS | SOFTWARE DEVELOPER

Apr 2021 -- Apr 2022 | Costa Rica

- Built CI/CD pipelines from scratch (Jenkins, SonarQube) for a Flask (Python) project; wrote automated tests with pytest.
- Built a PySpark pipeline on Azure Databricks merging multiple Salesforce data sources into a unified dataset.
- Designed an MQTT (Mosquitto) event-driven broker with Prometheus/Grafana dashboards for a SCADA system.

UNILEVER | FULL STACK ENGINEER

Apr 2019 -- Apr 2021 | Belén, Heredia, CR

- As sole developer, ran the full SDLC to build a Go-based backend system from scratch, designing the database and business logic to meet FDA/Quality traceability requirements.
- Gathered requirements directly from engineers, operators, and mechanics across departments, turning them into working modules.
- Built Python/Flask microservices and REST APIs for operational reporting.
- Built real-time dashboards (Power BI, Chart.js, D3.js) tracking core KPIs (OEE, giveaway).

SKILLS

LANGUAGES / FRAMEWORKS

Python • Go • Node.js • C# • SQL
FastAPI • Flask • Express

DATABASES

SQL Server • Oracle • Cosmos DB (NoSQL)
• Redis

APIS / INTEGRATION

REST • SOAP • webhooks
MQTT / event-driven • microservices
payment gateways

CLOUD / DEVOPS

Azure (AKS, DevOps, Databricks, Data Lake,
Service Bus, Cosmos DB)
DigitalOcean • Docker • CI/CD (Jenkins,
Azure DevOps)
Git • pytest

LANGUAGES

Spanish (native) • English –
Upper-intermediate (B2+)

CERTIFICATIONS

Intro to Machine Learning – Kaggle
NASA Space Apps Challenge – 2017
Hackathon 2019 – Public Finance (IMF)

EDUCATION

TECNOLÓGICO DE COSTA RICA

B.S. COMPUTER SCIENCE ENGINEERING
2017 -- 2022 | San José, CR

CTP MERCEDES NORTE

TECHNICAL, BUSINESS INFORMATICS
2013 -- 2015 | Heredia, CR
